

VIRTUAL VISIT TO INDIAN PILGRIMAGES

Link To Website - <https://shri-ram-mandir.herokuapp.com/>

OUR IDEA -

The idea is to implement a Virtual 3D model demonstration of various temples and pilgrimage experience for anyone sitting in any part of the world. **People are now just one click away from witnessing beautiful places and pilgrimage.**

OUR GOAL -

- To spread the feeling of positivity and devotion among the public.
- Financially profitable for the country by making it an attraction for tourism.
- Profitable for anyone who wants to know about these places but can't visit the sacred place due to hectic schedules(students who wants to study about these places)

BUSINESS SCOPE-

- Travel agency through which the users can go to a particular pilgrimage physically where we can also get the commission on every single booking done by the user.
- We also have donation page and we take a small percentage like 0.5% on every request.
- We can also monetize our data to improve our performance.

FUTURE SCOPE-

- To make site more responsive so that it take less time to load.
- We will not be able to cover a lot of pilgrimages due to the time constraint but in future we will try to cover all the pilgrimages of India.
- Our future scope will be to include live links of important events and ceremonies on website.
- To implement inner 3d scene of places also.
